Description

Some woolen coats are sewn only exceptionally. They are made by combining pieces of wool that was not enough for more pieces. Each new batch of wool may have a slightly different shade, so from these pieces it does not make any sense to complete properly, but exceptionally! Just this exceptional becomes a great range of discoveries and joy. Excellent, very elegant colour combination to society for the real representation. Top clothes, suitable for an important visit or a concert etc. Are you amazed by ivory colour? It beautifully goes together with contrasting embroidery. Also the contrasting lining underlines the magic of the moment at such time as taking off clothes.

Caramel leather higher gloves cover forearm and are very nice accessory to the woolen paletots.

Size chart

Don't you know exactly the size of your hand?

The glove size equals the circumference of hand over joints (the widest part of the hand), i.e. at the lower ends of the third phalanges. In this position, it is measured the circumference of the joints by a tape measure or a string later measured by a ruler. The length, you measured, is the size of your hand.

For example: you measured 19 cm, your size is number 19. In French inches it is the size 7 (French inch = 27, 07 mm).

French inch has been used since the beginning of glove production, size in centimeters came into fashion later.
